Attorney's Docket No.: 09531-005001 / 97141

B4
17. (Twice amended) A Factor VII or Factor VIIa polypeptide comprising a modified GLA domain that enhances membrane binding affinity of said polypeptide relative to a corresponding native Factor VII or Factor VIIa polypeptide, said modified GLA domain comprising an aspartic acid residue at amino acid 33 (residue 32 of SEQ ID NO:3 or SEQ ID NO:4). --
